lbs 90.00-100.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

The weather just keeps getting better for curing hay. A couple poor days over the weekend, but other than that most of the state has seen very nice temperatures and some slight to moderate breeze this week, just about perfect for making hay. As a state we are doing pretty well with harvest, As of Tuesday morning 40% of the first cutting of Alfalfa is complete, and 17% of other hay was complete. Cattle prices are steadily working higher, we once again hit the magic 80.00 fat cattle this week, which may put some money in the farmers pockets to buy some hay with. Prices mostly steady. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .04 higher, medium .01 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .44-.48, Medium .32-.34, Small .12-.16.

## WHOLESALE FEEDSTUFFS PRICES (DOLLARS PER TON-BULK BASIS)

#### "Show-Me Select" Bred Heifer Sales

Heifers have met minimum standards for reproductive soundness, pelvic size, body condition and weight and are free of blemishes. Heifers have been graded and screened by MDA/USDA certified graders. Heifers have been bred to bulls meeting strict calving ease/birth weight EPD requirements. A strict immunization program has been followed including official Brucellosis calfhood vaccination, a negative test prior to the sale. Many have been synchronized and will calve in a short time period.

**Friday June 06, 2003**

**Kingsville Livestock Auction, Kingsville, MO**

Selling 140 Angus/Angus cross, Red Angus cross, Simmental cross heifers. Calving dates from August 30 to November 8, 2003.

**More Information Contact: David Hoffman 816-380-8460 or Greg Onstott 573-690-7125 or 573-751-7766.**

Cull 1, 20.00-25.00 (per cwt.)

SLAUGHTER LAMBS: Ch & Pr  
90-150 lbs; new crop 106.00-  
108.00. shorn 104.00-106.00 (per  
cwt.)

FEEDER LAMBS:  
50-70 lbs 100.00-110.00, 70-90  
lbs 90.00-100.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Not much hay wrapped up this week. The weather has been just down right miserable for making hay. Seeing were it is June I guess that even if things are completely flooded we really shouldn't complain, but it is very frustrating for farmers trying to bale hay. Trade is still on the slow side. A few loads of hay being sold each week but nothing to really brag about. Most sellers that are moving hay are working very hard to do so. Prices mostly steady. (Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium .01 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .44-.48, Medium .33-.35, Small .12-.16.

#### Weekly Crop Report

Missouri farmers moved ahead rapidly with spring planting as favorable weather prevailed in most areas. Days suitable for fieldwork during the past week averaged 5.6, the most since the new crop season began. The topsoil moisture supply was reported as 1 percent very short, 11 percent short, 82 percent adequate and 6 percent surplus. The driest areas are the southwest and south-central districts with moisture ratings of over 20 percent short, while the highest ratings are in the east-central and southeast districts with about 13 percent surplus moisture. Field Crops Report: Ninety-seven percent of the intended corn acreage has been planted, over a week ahead of a year ago and 2 days ahead of the 5-year average of 95 percent. Progress ranges from 97 to 100 percent planted in all districts except the northeast, east-central and south-central districts where planting is 92 percent or less complete. Eighty-six percent of the corn has emerged, slightly ahead of last year and normal. Corn condition is reported as 1 percent very poor, 4 percent poor, 30 percent fair, 53 percent good and 12 percent excellent, virtually unchanged from a week earlier. Cutworms have been found in a few corn fields but damage appears to be minor. Sixty-five percent of the expected soybean acreage has been planted, a week ahead of last year and 2 days ahead of the average of 61 percent. Bean planting is the most advanced in the northwest district with 86 percent in the ground, while 30 percent or less is planted in the southwest and south-central districts. Thirty-three percent of the soybeans have emerged, ahead of last year but a few days behind the average of 41 percent due to the later initial plantings and recent cooler temperatures. Sorghum is 63 percent planted, nearly a week ahead of last year but 3 days behind the 5-year average of 67 percent. Progress by district ranges from about a third planted in the northeast and south-central districts to 84 percent in the southeast and 93 percent in the northwest percent excellent. Winter wheat is rated as 1 percent very poor, 6 percent poor, 28 percent fair, 50 percent good and 15 percent excellent, similar to a week earlier. Ninety-eight percent of the crop is headed or beyond, similar to normal. Only the northwest and north-central districts have less than 94 percent heading. Fifty-one percent of the wheat is turning color, ranging from 4 percent in the northeast district to 89 percent in the southeast.

lbs 90.00-100.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

There wasn't much hay baled last week and even less this week. Rains continue to fall and many areas are becoming quite saturated, some farmers in southeast MO have completely given up on planting. Farmers would be very happy to get a break in the weather. If the weather will provide some sun wheat harvest could start in the next couple weeks. The wheat looks good as far as grain, but some doubts about the attractiveness of the straw. First cutting Alfalfa is now at 76 percent complete, 10 percent ahead of last year and 1 percent behind the average. Prices mostly steady. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .44-.48, Medium .33-.35, Small .12-.16.

#### Weekly Crop Report

Rain over most of the State last week provided good growing conditions for crops but caused some delays in haying and late crop plantings. The over-all progress of fieldwork compares favorably with recent years. Days suitable for fieldwork during the past week averaged 3.3, ranging from less than 2 days in the northeast and west-central districts to 5 or more days across the southern third of the State. The topsoil moisture supply was reported as 7 percent short, 85 percent adequate and 8 percent surplus. Subsoil moisture is rated as 3 percent very short, 25 percent short, 70 percent adequate and 2 percent surplus. Field Crops Report Ninety-two percent of the corn has emerged, 3 days ahead of last year and similar to normal. Corn condition is reported as 2 percent very poor, 4 percent poor, 29 percent fair, 54 percent good and 11 percent excellent, virtually unchanged from a week earlier. Spraying has been necessary to control cutworms and leaf beetles in some corn fields. Seventy-five percent of the expected soybean acreage has been planted, 5 days ahead of last year and 2 days ahead of the average of 72 percent. Bean planting ranges from 36 percent or less complete in the southwest and south-central districts to 85 percent in the north-central and 94 percent in the northwest. Fifty-two percent of the soybeans have emerged, 3 days ahead of last year but 2 days behind the average of 57 percent. Soybean condition is rated as 1 percent very poor, 4 percent poor, 36 percent fair, 54 percent good and 5 percent excellent. Sorghum is 78 percent planted, 5 days ahead of last year but close to the 5-year average of 79 percent. Winter wheat condition is rated as 6 percent poor, 26 percent fair, 53 percent good and 15 percent excellent, also similar to a week earlier. Seventy-seven percent of the wheat is turning color, slightly later than average, ranging from 25 percent in the northeast district to 98 percent in the southeast. Damp weather has stimulated the development of leaf rust in some areas but no major damage is expected. The wheat harvest has generally not begun, compared with 3 percent last year and 6 percent for the 5-year average. Seventy six percent of the first cutting of alfalfa hay has been cut, several days ahead of last year and nearly equal to normal. The recent rains have improved the outlook for future cuttings. Forty-five percent of other hay is cut, 5 days ahead of a year ago and close to the normal pace.

50-70 lbs 90.00-100.00, 70-90  
lbs 80.00-90.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

After a couple weeks of difficult farming weather, this week has given us a preview of what good summer hay making weather is suppose to be like. Just about every tractor in the state made it to the fields this week. The few farmers stated on the second cutting of alfalfa have a smile on there face that reaches from ear to ear as they are finally getting to bale some high quality hay. Wheat harvest is now under way so some new crop straw should enter the market soon. Prices mostly steady. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00. Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .02 higher, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .46-.50, Medium .33-.35, Small .12-.16.

## Missouri Regional Fescue Seed Report

Farmers are out taking samples but most are finding just a little too much moisture to pull through the gates just yet. If no rain pops up areas in the south expect to start see a good number of trucks buy Tuesday or Wednesday. Areas in the north are saying that it is still about 10 to 14 days before they expect to see much action. The crop this year is expected to yield another good harvest, this added with the left over from last year means that buying stations will be very picky with seed quality this year. Early calls are reporting prices are steady with the start of last season and just a couple cents higher than the end of last year on the wet moisture but steady on the dry moisture. (Dry: Moisture 12-14%-Wet: Moisture greater than 14%) (Prices per lb.)Prices: .18 wet, .20 Dry

## WEEKLY COMMODITY GRAIN FUTURES TRENDS

Compared to last Friday: Soybeans .06 to .15 higher, Wheat .01 to .06 lower, Corn .01 to .02 lower, Soybean meal .30 to 1.50 higher, except Oct .20 lower, KC wheat steady to .09 lower, (all price trends approximate ranges).

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

#### Definitions:

\*\* DIB = diameter inside bark at small end

\*\*\* MBF = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by: three sides clear • both ends solid • determined to be sound and of good quality by buyer Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color. To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

80.00-85.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Rains fell over most of the state bringing hay balers a temporary stop. In the past couple weeks a tremendous amount of hay has been harvested in the state. Most second cutting Alfalfa is done in the southern part of the state and some have even taken an early second cutting of some grass and clover hay as well. As predicted many producers are running out of places to put hay, and buyers for beef cattle hay are generally still not showing a lot of interest to get hay early. Dairies and horse farmers are still buying a little hay, but they too are bulking at most asking prices. Hay prices this week were steady, supply is moderate to heavy, and demand is light. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square. Wheat straw large rounds picked up in field 20.00 per bale.

### MIDWEST EGG REVIEW

Prices on large .01 higher, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .47-.51, Medium .33-.35, Small .12-.16.

### Missouri Regional Fescue Seed Report

Many areas quite possibility had harvest cut short last night. Some areas In central and north of I-70 received strong winds and heavy rain, which can be disaster to a crop that becomes as sensitive as fescue right before harvest. Total extent of damage will not be known for a couple of days. This could not have come at a worse time as conditions were just becoming right, moisture content in the southwest was being measured in the high teens from standing crop. The southwest part of the state had been harvesting since right after last weeks report with more trucks arriving each day. Central and southeast had also begun. Most of the northeast and northwest areas were still waiting for less moisture. Prices this week remained steady in all areas of the state. (Dry: Moisture 12-14%-Wet: Moisture greater than 14%) (Prices per lb.)Prices: .18 wet, .20 Dry

## WEEKLY COMMODITY GRAIN FUTURES TRENDS

Compared to last Friday: Soybeans july .02 higher others .04 to .11 lower, Wheat .14 to .16 lower, Corn .08 to .09 lower, Soybean meal 1.10 to 4.60 higher, KC wheat may steady, others .06 to .07 lower, (all price trends approximate ranges).

\*This is a **delivered** log report. It **does not** represent or imply prices paid for  
standing timber on your land. Values of standing timber can vary significantly  
from delivered due to the following: proximity to solid roads and saw mills,  
size of offering and proximity to other offerings, land terrain, prevailing  
conditions, quality, size, density, and species of timber.

#### Definitions:

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board  
foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry  
grade one logs and more specifically described by the DIB and length in the  
report, as well as by: three sides clear • both ends solid • determined to be  
sound and of good quality by buyer Buyers use many criteria to determine  
the soundness and quality of a log, including, but not limited to: ring size,  
frost cracks, sweep, stain, back thickness, scars, crook, and color. To realize  
the most from the sale of timber, it is recommended to seek the advice of a  
professional forester. For more information call 1-800-328-1165.

FEEDER LAMBS:  
50-70 lbs 85.00-90.00, 70-90 lbs  
80.00-85.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Scattered summer showers fell in a isolated spots this week dropping as much as an inch of rain in a few small areas. Movement is still fairly slow, as most farmers are more worried about baling hay than selling it at the moment. A few farmers are seeing straw sales pick up a little. The hay crop in MO has been exceptional so far this year the nice weather during June allowed for very good growth of hay. We have had a tremendous amount of grass hay baled this year with many farmers getting a very early second cutting. Alfalfa hay has been good as far as the amount goes but most quality has been a bit lower mostly because the weather has not allowed farmers to get it cut at the best times. Hay prices this week were steady, supply is moderate to heavy, and demand is light. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square. Wheat straw large rounds picked up in field 20.00 per bale.

## MIDWEST EGG REVIEW

Prices on large steady, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .47-.51, Medium .33-.35, Small .12-.16.

## Missouri Regional Fescue Seed Report

Fescue seed prices in all areas of the state are steady with last week. Seed is dry in southern Missouri. Harvest described as moderate to heavy and nearly complete. Mid-Missouri's seed moisture at 14% to 20% with supply heavy to moderate and harvest estimated to be 60-75% complete. Northern moisture levels range from 14% to 19% in the west and 19% to 24% in the east. Supply moderate to mostly light, harvest 40% to 75% complete. All areas of the state report cleaner heavier seed than last year. Quantity of the harvest was smaller than it's potential, because many of last year's seed fields became hay fields this year due to heavy orchard grass discounts, hay shortage in the Northwest, and a lower price for seed across the state. (Dry: Moisture 12-14%-Wet: Moisture greater than 14%) (Prices per lb.)Prices: .18 wet, .20 Dry

## WEEKLY COMMODITY GRAIN FUTURES TRENDS

Compared to last Friday: Soybeans .05 to .12 lower, Wheat .06 to .09 higher, Corn .05 to .08 lower, Soybean meal 4.90 to 7.70 lower, KC wheat .01 lower to .04 higher. (all price trends approximate ranges).

\* NEW CROP

#### Weekly Crop Report

Missouri farmers made good progress with wheat harvesting and haying as weather was favorable over most of the state during the past week. Days suitable for fieldwork averaged 4.9, with all districts indicating at least 4 days suitable. Row crops are making good growth except where hampered by excessive moisture in low areas. The topsoil moisture supply was reported as 1 percent very short, 17 percent short, 79 percent adequate and 3 percent surplus. The west central district is the driest area, with a rating of 47 percent being short or very short. Areas with surplus moisture are mostly scattered and localized but still significant where flash flooding occurred. Twenty percent of the corn is silking, nearly the same as a year earlier but behind the 5-year average of 23 percent. Silking progress ranges from virtually none in many northern counties to 80 percent in the southeast district. Corn condition is reported as 1 percent very poor, 5 percent poor, 22 percent fair, 56 percent good and 16 percent excellent, virtually unchanged from a week earlier. Ninety-five percent of the expected soybean acreage has been planted, slightly behind a year earlier but a few days ahead of the 5-year average of 92 percent. Planting in the southern third of the State is least advanced, varying from about 80 percent complete in the southwest and south-central districts to 89 percent in the southeast. Bean planting is virtually complete in most northern counties, with mainly some of the previously flooded fields still being planted. Eighty-six percent of the soybeans have emerged, compared with the 5-year average of 89 percent. Soybean condition is rated as 1 percent very poor, 7 percent poor, 32 percent fair, 52 percent good and 8 percent excellent, similar to a week ago. Sorghum is 96 percent planted, nearly the same as last year and the average of 98 percent. Pasture condition ratings are reported as 5 percent poor, 31 percent fair, 54 percent good and 10 percent excellent, a minor decline from a week earlier. Condition is holding well above the ratings of the past 2 years for this date.

## MISSOURI WEEKLY HAY SUMMARY

Rains fell over most all the state last night. Some farmers ended up with some wet hay, but none of them are that upset about it. The past couple weeks of hot dry weather had really dried out a lot of soil and many crops were in need of rain. With the great month of June there has been a very large amount of hay baled in the state so far this year. It seems we have had a very difficult time of making any hay on the higher end of the quality scale this year, but fair to good hay is abundant. At the current rate of most sales many farmers are flat going crazy as many have barns full and fields are getting smaller as high piles grow larger. Hay prices this week were steady to 5.00 lower as the amount of hay is putting a lot of pressure on the market, supply is moderate to heavy, and demand is light. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium steady, small .02 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .47-.51, Medium .33-.35, Small .12-.18.

## Missouri Regional Fescue Seed Report

Fescue seed prices in all areas of the state are steady with last week. Harvest is basically complete in the state. Most buying stations have closed now, but a few are still taking seed. This year's estimated yield is expected to be somewhere around 65 to 70 million pounds of seed, which would be about 30 million lower than last years estimated harvest. Many factors have become apart of this years harvest from farmers just deciding to make hay, low prices, and the fact that large discounts were taken for orchard grass. So the lower harvest wasn't all because of a lack of seed, but more a lack of harvest. This will be the last fescue market this year. (Dry: Moisture 12-14%-Wet: Moisture greater than 14%) (Prices per lb.)Prices: .18 wet, .20 Dry

## WEEKLY COMMODITY GRAIN FUTURES TRENDS

Compared to last Friday: Soybeans .06 to .21 lower, Wheat .06 to .12 higher, except May .07 lower, Corn .04 to .07 lower, Soybean meal Jul 3.50 higher, others 1.12 to 5.50 lower, KC wheat .01 to .04 higher, except May .03 lower. (all price trends approximate ranges).

## Weekly Crop Report

A generally favorable outlook for Missouri row crops continues over most of the State but rain will be needed soon to maintain growth and development. The dry, hot weather of the past week was excellent for harvesting wheat and hay, as 6 days were suitable for fieldwork, ranging from 4.6 days in the southeast district to 5.9 or more in all other districts. The topsoil moisture supply was reported as 6 percent very short, 34 percent short, 59 percent adequate and 1 percent surplus, as all areas except the southeast showed sizeable declines in moisture ratings. The northwest and west central districts are the driest areas, with ratings of over 60 percent being short or very short, a rapid decline over the past 2 weeks. The subsoil moisture supply, statewide, is rated as 8 percent very short, 35 percent short, 56 percent adequate and 1 percent surplus. Field Crops Report: Forty-three percent of the corn is silked, virtually the same as a year earlier and the 5-year average. Silking progress ranges from 10 percent complete in the northeast district to 95 percent in the southeast district. Reporters in many areas are hopeful that rain is received soon to ensure continued growth and thorough pollination. Corn condition is reported as 1 percent very poor, 6 percent poor, 25 percent fair, 52 percent good and 16 percent excellent, down slightly from a week earlier. Virtually all of the intended soybean acreage has been planted and 95 percent of the crop has emerged. Five percent of the beans have reached the blooming stage, several days behind both the 9 percent last year and 15 percent average. Condition of the crop is rated as 1 percent very poor, 6 percent poor, 31 percent fair, 52 percent good and 10 percent excellent, similar to a week ago. Ten percent of the sorghum is headed, 3 days ahead of last year and 1 day ahead of the 7 percent average. Condition of the crop is rated as 6 percent poor, 36 percent fair, 52 percent good and 6 percent excellent, virtually unchanged from last week. Ninety percent of the winter wheat is harvested, 3 days behind last year's early progress but 2 days ahead of average. Harvesting varies from 57 percent complete in the northeast district to 95 percent across the central third of the State and 99 percent in the southeast district. Seventy-two percent of the second crop of alfalfa hay has been cut, 4 days ahead of last year and a week ahead of the 57 percent average. Eighty-seven percent of other hay is cut, 5 days ahead of last year and over a week ahead of normal.

75.00-80.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Farmers throughout all the state are still making hay. Areas in south central, northwest, and west central are in the need of rain at this time, most other areas are not as dry. Of course, in July it doesn't take long for the soil to dry and rains are accepted any time mother nature feels friendly. Farmers are starting or already underway on third cutting of alfalfa. Just about all the second cutting of alfalfa and grass has been completed statewide. Leafhoppers are arriving, with hot dry temperatures, in many un-sprayed fields of alfalfa. Hay movement this week, as it has been all summer, is nothing to get excited about most farmers that might need hay come feeding season appear to be waiting as they all feel there will be plenty for sale when snow falls. Hay prices this week were steady, supply is moderate to heavy, and demand is light. Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .01 higher, medium steady, small steady to .02 higher.  
IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .48-.52, Medium .33-.35, Small .14-.18.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timer, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

75.00-80.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Hay farming can become quite repetitive in the middle of summer. The excitement from the beginning of season seems to disappear and haying isn't quite as much fun, the tractor seats seem get harder and the fields get rougher. According to this weeks state crop report here is how the state progress is currently standing: Ninety-three percent of the second crop of alfalfa hay has been cut, a few days ahead of the both last year and normal, while the third cutting is 13 percent complete, equal to normal. Ninety-eight percent of other hay is cut, over a week ahead of last year and normal. Many farmers are saying that so far they have baled a very large amount of hay from the first two cuttings, but as they are starting the third cutting yield is falling flat on it's face because of the lack of rain in many areas. Hay prices this week were steady. Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .02 higher, medium steady, small .01 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .50-.54, Medium .33-.35, Small .15-.19.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timer, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

## MISSOURI WEEKLY HAY SUMMARY

With out the help of some rain, hay season could be basically over in some areas soon. A little over a one-fourth of the third cutting of alfalfa is complete now, good hay just very little of it. Pasture conditions have many farmers becoming a little concerned. Grass in many areas seems to be drying up earlier than it should. Even though we had a large harvest in the first two cuttings if many farmers have to begin feeding hay in a month it won't take long to reduce supply. Hay prices this week were steady, some talk of higher prices in the near future especially if it continues to stay dry. Supply is moderate to heavy, and demand light to moderate Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .04 higher, medium .01 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .54-.58, Medium .34-.36, Small .15-.19.

#### Weekly Crop Report

A week of hot, dry weather is causing stress to row crops in the driest areas. Reporters indicate that rain is needed soon to maintain yield prospects. Condition of crops is showing some decline but ratings in most areas are still predominantly fair to good. The topsoil moisture supply was reported as 16 percent very short, 36 percent short, 47 percent adequate and 1 percent surplus, a general decline for the State as rainfall was minimal in most areas. The driest areas are the northwest and west-central districts where topsoil moisture ratings fell to 85 percent short or very short. The State averaged 6.1 days suitable for fieldwork with all districts averaging over 5 days. Field Crops Report Eight-one percent of the corn is silked and 26 percent has reached the dough stage, virtually the same as a year earlier and the 5-year average. Development ranges from 47 percent silked and 7 percent in the dough stage in the northeast district to 100 percent silking and 62 percent in the dough stage in the southeast. Many farmers in the driest areas are concerned that the moisture supply will be insufficient for full development of ears. Corn condition declined to 3 percent very poor, 10 percent poor, 30 percent fair, 48 percent good and 9 percent excellent, still well above the comparatively low ratings of a year earlier on this date but slightly below 2 years ago. Thirty-seven percent of the soybeans have reached the blooming stage and 7 percent are setting pods. Podding is 2 days behind last year and 4 days behind the 13 percent average, as the delay in the earliest soybean plantings continues to be reflected in development progress. Condition of the crop is rated as 3 percent very poor, 9 percent poor, 37 percent fair, 45 percent good and 6 percent excellent, down moderately from a week ago but well above a year earlier. Twenty-nine percent of the sorghum is headed, 3 days ahead of last year but slightly behind the 5-year average of 33 percent. Condition of the crop is rated as 1 percent very poor, 8 percent poor, 36 percent fair, 49 percent good and 6 percent excellent, down slightly from last week but well above last year at this time. Ninety-three percent of the second crop of alfalfa hay has been cut, a few days ahead of the both last year and normal, while the third cutting is 13 percent complete, equal to normal. Ninety-eight percent of other hay is cut, over a week ahead of last year and normal.

## MISSOURI WEEKLY HAY SUMMARY

The state continues to get drier with each day that passes. For the most part though we need rain now. Sadly reports this week that some farmers already having to set out some hay to supplement the little pasture left. The worst area in the state once again this year seems to be the northwest. Central, west central and a few areas in southwest especially around the Lamar area are also hurting for water. Farmers have given up on a lot of corn as well and have begin to chop it. Farmers are also saying that the current cutting of hay is basically burnt up and unless it rains soon equipment just as well be parked for the year. The only good news is on the east side of MO were rains have been friendly to most. Hay prices this week were steady, supply is moderate, and demand considered light to moderate. Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .09 higher, medium .06 higher, small .03 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .63-.67, Medium .40-.42, Small .18-.22.

#### Missouri Weekly Crop Report

Dry weather continues to erode the potential for row crop yields in much of the State but considerable variation exists by area. Crop conditions show sizeable declines in the northwest, north-central, west-central and central districts as the drought expands beyond the northwestern and west-central counties. Crops in many eastern counties and particularly the southeast district have fared better with timely rains. The topsoil moisture supply was reported as 34 percent very short, 34 percent short and 31 percent adequate and 1 percent surplus, with the northwest and west-central districts showing ratings of 97 percent short or very short. Subsoil moisture is rated as 31 percent very short, 42 percent short and 27 percent adequate. An average of 5.9 days were suitable for fieldwork, varying from 2.8 days in the southeast district to about 6 or more days in the northern two-thirds of the State. Ninety-three percent of the corn is silked, 57 percent has reached the dough stage and 21 percent is dented, similar to the progress of a year earlier and the 5-year average. Development ranges from 33 percent in the dough stage or beyond in the northeast district to 83 percent in the west-central and south-west districts and 98 percent in the southeast. Corn condition for the State as a whole declined to 12 percent very poor, 21 percent poor, 30 percent fair, 31 percent good and 6 percent excellent, still above a year ago for this date when 45 percent was rated poor or very poor. Corn in some fields of northern and western counties is considered hurt beyond recovery with only limited potential at this time. Farmers are already cutting the poorest fields for silage. Sixty-four percent of the soybeans have reached the blooming stage and 26 percent are setting pods. Development is 3 days behind last year and 6 days behind the average of 74 percent blooming and 37 percent podding. Condition of the crop is rated as 9 percent very poor, 16 percent poor, 37 percent fair, 34 percent good and 4 percent excellent, close to the rating of a week ago but with declining ratings in the driest areas and improved conditions where rain was received. Most soybeans in the dry areas could still show significant recovery if rain is received soon but moisture is critical for the current pod-filling phase. Fifty-seven percent of the sorghum is headed and 10 percent is turning color, about the same as last year but 4 days behind the 5-year average of 66 percent headed. Condition of the crop is rated as 4 percent very poor, 9 percent poor, 48 percent fair, 33 percent good and 6 percent excellent, as an improved outlook in the heavy sorghum-producing area of the southeast district approximately offset the decline in the driest areas. Forty-five percent of the third crop of alfalfa hay is cut, 2 days behind last year but ahead of normal. Some of the main alfalfa-growing region is expected to have little or no third cutting due to the moisture shortage.

75.00-80.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Hay and crop conditions continue to fall. Many farmers are now holding to hope that fall rains might arrive early. Isolated rains and summer pop up showers are becoming more abundant but most of these only provide enough moisture to settle the dust for a few hours. There is a large supply of average quality hay for sale but so far even with some light feeding going on hay demand has remained about the same all summer. Corn prices are also on the rise this week and with a lower than average crop expected in the state this year farmers might turn to feeding more hay in the near future. Hay prices this week were steady, supply is moderate, and demand considered light to moderate. Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .04 higher, medium .04 higher, small .02 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .67-.71, Medium .44-.46, Small .20-.24.

#### MISSOURI AG LAND VALUES

(COLUMBIA, Mo.) -Missouri farmland values increased 5.3 percent to \$1,600 as of January 1, 2003 compared with \$1,520 on January 1, 2002. Cropland values increased 6.8 percent to \$1,570 per acre and pasture values increased 5.8 percent to \$1,000 per acre.

#### U. S. Farm Real Estate Values Continue Strong Upward Trend

Farm real estate values, a measurement of the value of all land and buildings on farms, averaged \$1,270 per acre as of January 1, 2003, up 5.0 percent from the previous year. The value of farm real estate increased in all States except Kansas, where values remained at 2002 levels. The \$60 per acre increase in farm real estate values continued an upward trend that began in 1987. The increase in all land and buildings followed the trend of cropland pasture values, which rose by 4.2 and 5.1 percent, respectively, from January 1, 2002. Cropland values averaged \$1,720 per acre and pasture values averaged \$618 per acre on January 1, 2003, compared with \$1,650 and \$588 per acre, respectively, a year earlier. The increases in farm real estate and the cropland and pasture components were largely, though not entirely, driven by low interest rates and poor returns for alternative assets. The certainty of government commodity programs also lent support to some agricultural land. Also, potential for nonagricultural uses contributed to strong increases, especially for pasture values. Income from crop and livestock commodities were mixed, providing limited support for farm real estate values in some areas, while creating a slight drag on values in other areas. Regional increases in the average value of farm real estate ranged from 3.4 percent in the Pacific region to 7.6 percent in the Lake region. The highest farm real estate values were in the Northeast region, where urban influences drove the average value to \$2,950 per acre. In the Appalachian and Southeast regions, where urban and recreational influences are increasing, farm real estate value's rose 7.1 percent to \$2,420 per acre. The Mountain region, with its expanse of pasture and rangeland, has the lowest farm real estate value, at \$526 per acre. Cropland values rose 4.7 percent, to \$2,450 per acre, in the Corn Belt and 2.6 percent, to \$738 per acre, in the Northern Plains. Together these regions account for about one-half of the U.S. total cropland acres. The highest average cropland values, at \$3,720 per acre, are in the Pacific region, where a significant portion of the cropland is irrigated.

75.00-80.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Most of the state has now had at least four consecutive days of 100 plus temperatures. The approaching cold front has many hoping for some very past due rain which could still help the fall pastures and maybe a few crops. Most crops have reached the point that rain now would just be to little to late. Pastures continue to dry out and each day more farmers begin to put out a little more hay. Even with the dry and hot weather and the fact hay is being fed the amount of hay being sold is currently near nothing. Surprisingly enough hay demand has shown no increase, as farmers seem to be feeding the hay they baled from the early cuttings. Hay prices this week were steady, supply is moderate, and demand considered light. Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .01 lower, medium .01 lower, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .66-.70, Medium .43-.45, Small .20-.24.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

#### Definitions:

\*\* DIB = diameter inside bark at small end

\*\*\* MBF = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

80.00-85.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

The oppressive heat of the last two weeks has left pastures and crops in dire need of moisture, and with only a slight chance of rain the next few days demand for hay increased slightly this week. Most producers have had phone calls but with the steady prices have sold little hay. Seems as most cattle producers have hay on hand and are only testing the waters when it come to actually purchasing hay. Supplemental feeding is the norm over the northern two-thirds of the state as the southern areas are still in decent shape. Hay prices this week were steady, supply is moderate, and demand considered light. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .06 lower, medium .05 lower, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .60-.64, Medium .38-.40, Small .20-.24.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timer, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

lbs 85.00-90.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

What a difference a week can make in Missouri. Most of the state got a large amount of rain over the holiday weekend; most reports were from 3 to as much as 7 or 8 inches. Pastures turned green almost over night and the mood in at most local coffee shops became quite cheerful. A local farmer explained the situation best by saying, "you know it was dry when we had 6.5 inches of rain and two days later there is not a bit of mud anywhere." The rain has given hope of a late cutting of hay, however it will take a little time to tell how this is going to turn out. Many producers have their hands up in the air trying to figure out what the coming winter holds for the hay market since nothing this year has been normal. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large .01 lower, medium .01 lower, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .59-.63, Medium .37-.39, Small .20-.24.

**Weekly Crop Report**

Hot weather continued to push corn and sorghum into maturity and stress soybeans before heavy rains spread over the State on the weekend. Although the rain came too late to help corn and most of the sorghum, farmers are hopeful that much of the soybean crop will still be improved. The topsoil moisture supply jumped to 9 percent very short, 19 percent short, 61 percent adequate and 11 percent surplus. An average of 6.5 days were suitable for fieldwork. Ninety-eight percent of the corn has reached the dough stage or beyond, 87 percent is dented, and 52 percent is mature, with development slightly ahead of last year and the same as the 5-year average. Development ranges from 64 percent dented and 32 percent mature in the northeast district to 100 percent dented and 92 percent or more mature in the southwest and southeast. Corn condition is rated at 27 percent very poor, 29 percent poor, 26 percent fair, 14 percent good and percent excellent, similar to a week earlier. Nine percent of the corn has been harvested, the same as a year ago and close to the 5-year average. Harvesting is most advanced in the west-central, southwest and southeast districts where progress ranges from 19 to 25 percent complete. Ninety percent of the soybeans are setting pods, 18 percent are turning color and 4 percent are dropping leaves, similar to last year and average. Beans that were not forced into early maturity by the dry weather may now have a better chance to fill pods but the degree of improvement is uncertain at this time. Condition of the crop is rated as 27 percent very poor, 29 percent poor, 27 percent fair, 14 percent good and 3 percent excellent, a slight gain from a week earlier. Fifty-eight percent of the sorghum is turning color and 11 percent is mature, 3 days behind last year and a week behind the average of 73 percent turning color. Condition of the crop is rated as 14 percent very poor, 23 percent poor, 39 percent fair, 21 percent good and 3 percent excellent, a minor change from a week ago. Pasture condition ratings are reported as 46 percent very poor, 29 percent poor, 18 percent fair, 6 percent good and 1 percent excellent, virtually unchanged from a week ago. Supplemental hay feeding is expected to be necessary until new growth is generated. Reporters are hopeful that the improved moisture situation will result in some decent fall pasture feed. Stock water supplies are rated as 20 percent very short, 32 percent short, 47 percent adequate and 1 percent surplus. Stock ponds still need some heavy run-off to restore water levels, as much of the recent rain came slowly and soaked into the ground immediately.

## MISSOURI WEEKLY HAY SUMMARY

Well seems mother nature is going to allow us to harvest a pretty good last cutting of Alfalfa in most of the state; or at least she is letting it grow if only weather will allow for baling. Straw is starting to move down the road a bit better as landscapers are getting fall work and many retailers are getting ready for fall yard decorating. Hay movement is really quite slow in the state, a lot of farmers are still feeding some hay but relying on the hay they baled early and not ready to replenish their supply yet, even as most sellers are taking much below normal prices for the top quality hay. Everyone is still more than ready to welcome more forecasted rain for the upcoming weekend, with hopes it will add some water to creeks and ponds before winter. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium .01 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .59-.63, Medium .38-.40, Small .20-.24.

#### Weekly Crop Report

Pastures and late soybeans are showing some improvement since the general rains of a week ago. The topsoil moisture supply was reported as 10 percent very short, 23 percent short, 63 percent adequate and 4 percent surplus, with the northwest district indicated as the driest area at 90 percent short or very short. The most excess moisture was reported in the north-central and southeast districts with ratings of 13 percent surplus. An average of 4.8 days were suitable for fieldwork. Ninety-two percent of the corn has reached the dent stage and 67 percent is mature, with maturity averaging 2 days ahead of the 5-year average of 64 percent. Development ranges from 71 percent dented and 42 percent mature in the northeast district to 100 percent dented and 96 percent or more mature in the southwest and southeast. Corn condition is rated at 28 percent very poor, 27 percent poor, 24 percent fair, 17 percent good and 4 percent excellent, similar to a week earlier. Fifteen percent of the corn has been harvested, 4 days behind last year and normal. Harvesting is most advanced in the southwest at 37 percent complete, followed by the west-central at 32 percent and southeast at 29 percent. Corn harvesting in the southeast would normally be well ahead of the rest of the State but wet weather and muddy fields have delayed progress. Ninety-five percent of the soybeans are setting pods or beyond, 24 percent are turning color and 8 percent are dropping leaves. The improved moisture supply and cooler weather have slowed the coloring process to 3 days behind average but many reporters indicated the pod-filling process will benefit from the additional moisture. Condition of the crop is rated as 24 percent very poor, 29 percent poor, 28 percent fair, 15 percent good and 4 percent excellent, a minor gain from a week earlier. Sixty-nine percent of the sorghum is turning color and 20 percent is mature, 6 days behind last year and 9 days behind the average of 85 percent turning color. Condition of the crop is rated as 10 percent very poor, 24 percent poor, 36 percent fair, 25 percent good and 5 percent excellent, with several areas showing a slight improvement from a week ago. The third cutting of alfalfa is 86 percent complete, a few days behind last year and normal. Pasture growth is in the recovery process following the weekend rain of a week ago. Condition ratings averaged 34 percent very poor, 34 percent poor, 22 percent fair, 9 percent good and 1 percent excellent, with most areas showing significant improvement from a week ago. The northwest district still shows the lowest ratings at 25 percent poor and 70 percent very poor.

110-120 lbs; 82.00-84.00, 120-140 lbs 84.00-86.00.

## MISSOURI WEEKLY HAY SUMMARY

A few farmers have managed to get the tractors fired back up and head to the hay fields. Many others are planning to follow suit shortly. Pastures in many areas have come back to life and are going to provide some good fall grazing, but there are some farmers that still have to feed hay. With all the rain that we have had you still can't tell by looking at the ponds, which are still well below normal in most areas. A few sellers stayed very busy this week filling previous orders, but almost all are catering to old customers and getting few inquiries from new ones. Hay prices this week are steady, with supply moderate and demand light. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .03 higher, medium .06-.07 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .62-.66, Medium .44-.47, Small .20-.24.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by: three sides clear, both ends solid, determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

lbs 84.00-86.00.

## MISSOURI WEEKLY HAY SUMMARY

Basically an uneventful week as far as the hay business goes. Many farmers are out putting up a last cutting trying to get as much hay as possible before snow flies. Everyone is reporting a good quality cutting, with the only complaint is that the hay is short. Hay movement is still pretty slow, some straw and horse hay moving, but generally most beef farmers are only calling and testing the water. Hay prices this week are steady, with supply moderate and demand light. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .02 higher, medium .07 higher, small .05 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .64-.68, Medium .51-.54, Small .25-.29.

## WHOLESALE FEEDSTUFFS PRICES (DOLLARS PER TON-BULK BASIS)

lbs 84.00-86.00.

## MISSOURI WEEKLY HAY SUMMARY

Hay movement remains light and demand is near zero as the fall pastures are as lush as we have seen in many years. The last couple of days have seen frost in the mornings and this has put a halt to the hay baling. Very few calls received by producers this week and most of those only checking on the prices. It appears that the cow/calf producers may have a chance to buy some quality forages at bargain prices. Hay prices this week are steady, with supply moderate to heavy and demand very light. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium .02 higher, small .02 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .64-.68, Medium .53-.56, Small .27-.31.

## WHOLESALE FEEDSTUFFS PRICES (DOLLARS PER TON-BULK BASIS)

This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:\*\* DIB** = diameter inside bark at small end \*\*\* **MBF** = 1,000 board feet \*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by: three sides clear both ends solid ▪ determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timer, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

## MISSOURI WEEKLY HAY SUMMARY

Several acres of late grass hay and final cutting alfalfa got wet this week when what looked like a dry week sound up a wet one by Wednesday and Thursday. Other than some movement in the drier areas of southwest Missouri, there was very little interest from buyers again this week. Even the drier areas of the state have had recent rains adding several tons of pasture over the last month. Hay prices this week are steady, with supply moderate to heavy and demand light. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium .01 higher, small .04 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .64-.68, Medium .54-.57, Small .31-.35.

**Weekly Missouri Crop Report**

The Missouri corn harvest is progressing at a normal pace while the harvest of soybeans, sorghum and cotton is well behind normal. Abnormally cool weather and heavy dew slowed the drying of row crops in many areas. An average of 5.9 days were suitable for fieldwork. The topsoil moisture supply was reported as 5 percent very short, 13 percent short, 80 percent adequate and 2 percent surplus, with the northwest district indicated as the driest area at 50 percent short or very short. Subsoil moisture is rated at 12 percent very short, 30 percent short and 58 percent adequate. Ninety-seven percent of the corn has reached maturity, slightly behind last year and the 5-year average. Sixty-nine percent of the corn has been harvested, 5 days behind last year but a day ahead of average. Harvesting progress varies from 44 percent complete in the northeast district and 53 percent north-central, to 92 percent west-central and 97 percent in the southeast district. Seventy-six percent of the soybeans are dropping leaves or beyond, 2 days behind average, but the proportion mature at 44 percent is 6 days behind both last year and average as the drying process progressed slowly during the cool weather. More than 50 percent of the beans in the northern third of the State are mature while the southern third ranges from about 13 percent mature in the southwest and south-central districts to 26 percent in the southeast. Condition of the crop is rated as 19 percent very poor, 27 percent poor, 32 percent fair, 18 percent good and 4 percent excellent, virtually unchanged from a week earlier. Thirteen percent of the soybeans are harvested, a week behind both last year and the 5-year average of 25 percent. Progress of the bean harvest ranges from 7 percent or less in the southwest and south-central districts to 20 percent in the northeast. Fourteen percent of the winter wheat acreage for next year's crop has been planted, 2 days behind both last year and the average of 17 percent. Progress ranges from 8 percent or less in the northeast and southwest districts, to 20 percent in the southeast. Wheat is just beginning to emerge, with moisture conditions favorable for giving the crop a good start in most areas.

## MISSOURI WEEKLY HAY SUMMARY

The weekly rains and reasonably warm weather continues to provide surplus pasture in the Show-Me state resulting in very little buyer interest and almost no movement this week to cattle producers. Straw has been in decent demand the last few weeks for lawn and landscape mulching, as well as for fall decorations. High quality grass hay continues to move to the horse and specialty markets. Hay prices this week are steady, with supply moderate to heavy and demand light. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .03 higher, medium .08 higher, small .08 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .67-.71, Medium .62-.65, Small .39-.43.

#### Crop Production

**Missouri Soybean Production Down 18 Percent from Last Year; Corn Production Up 8 Percent.** "Corn yields are turning out below average but still better than earlier expected," says Gene Danekas, State Statistician. "Soybean yields are turning out to be well below last year as producers begin harvest." Missouri soybean production is forecast at 139 million bushels based on October 1 conditions, down 2 percent from a month ago and 18 percent below the 2002 production of 170 million bushels. A State yield of 28 bushels per acre is expected, 1 bushel below the September forecast and 6 bushels below last year's yield. Yields in many areas are expected to be similar to the poor crop of 1999. Soybean acreage in the State is revised to 5.00 million acres planted with 4.95 million acres harvested for grain. Corn production in Missouri is forecast at 305 million bushels, up 6 percent from the September forecast and 8 percent above last year's low production. The forecast yield of 109 bushels is 8 bushels above the September forecast and 4 bushels above the 2002 yield. Of the revised 2.90 million planted acres, 2.80 million are expected to be harvested for grain. Missouri grain sorghum production is forecast at 14.9 million bushels, down 3 percent from the September forecast and 5 percent below last year. The State yield forecast of 71 bushels per acre is 4 bushels below last month's yield and 14 bushels below the yield a year earlier. Cotton production in Missouri is forecast at 600,000 bales, up 7 percent from the September 1 forecast but 2 percent below the 2002 production. The projected yield of 738 pounds is 49 pounds above a month earlier but 58 pounds lower than last year's yield. Rice production in the State is expected to total 10.4 million cwt, unchanged from September but 6 percent less than the 2002 production. A record yield of 6,100 pounds per acre is forecast which would be 50 pounds above the previous record 2002 yield. The production of all hay in Missouri is expected to total 8.90 million tons, 14 percent above a year ago. The forecast yield of 2 tons per acre is 9 percent above last year. **U.S. Soybean Production Down 10 Percent, Corn Up 13 Percent from 2002.** United States soybean production is forecast at 2.47 billion bushels, down 7 percent from the September forecast and 10 percent below 2002. If realized, this would be the lowest production since 1996.

lbs 83.00-85.00.

## MISSOURI WEEKLY HAY SUMMARY

Not every year can farmers say that they were bailing hay the end of Oct in short sleeves, however this week I witnessed three different farmers with in an hour of the capital city doing just that. Rains and above normal temperatures continue to allow grass to grow and many farmers are saying they have good pasture just as well bale some more hay. As far as hay movement goes not much as changed since the snow was falling last year. Cattle hay demand is light, horse and dairy hay is moderate, and straw is experiencing moderate to near heavy demand. All Hay prices are steady with moderate to heavy supply.. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .04 higher, medium .05-.07 higher, small .04 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .71-.75, Medium .67-.71, Small .43-.47.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:\*\*DIB** = diameter inside bark at small end \*\*\* **MBF** = 1,000 board feet \*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price

figured at Doyle Scale\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by: three sides clear, both ends solid ▪ determined to be sound and of good quality by buyer.

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

lbs 83.00-85.00.

## MISSOURI WEEKLY HAY SUMMARY

This week's weather started off very different from the previous as a cold front passed through the state; but another shot of warm air from the south has us right back in the mid 70's currently. Farmers are starting to make the phones ring now keeping any eye on market activity, but most still seem to be waiting to buy in hopes of even lower prices. Luckily most sellers are keeping the trucks at least on the roads delivering to dairies and hauling straw. Hay prices remain steady with slight firmness noted in the high end alfalfa sales to a few dairies, and knowing that winter is approaching it is hard to believe that prices will go any lower even with the heavy supply of medium quality hay. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .03 higher, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .74-.78, Medium .67-.71, Small .43-.47.

\*This is a delivered log report. It does not represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:\*\*DIB** = diameter inside bark at small end \*\*\* **MBF** = 1,000 board feet  
\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by: three sides clear, both ends solid ▪ determined to be sound and of good quality by buyer.

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timer, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

## MISSOURI WEEKLY HAY SUMMARY

Seems Mother Nature has forgotten fall as weather has changed from summer straight to winter. Hay is moving at a pretty steady to swift pace at the current time. Cattle farmers are still showing only slight interest other wise sellers might be way behind. There are some beef farmers putting out hay in small amounts, knowing that grass should be done growing for the year. The biggest concern at the current time is the supply of top quality alfalfa and brome that is available. Unless more shows up that has been hidden in a barn somewhere seems this supply will run out early this year. Hay prices remain steady with slight firmness still noted in the high end alfalfa sales to a few dairies and horse farms. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .07 higher, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .81-.85, Medium .67-.71, Small .43-.47.

#### Weekly Crop Report

Row crop harvesting advanced well in all areas of the State during the past week as favorable weather prevailed. An average of 5.6 days were suitable for fieldwork, ranging from 4.5 days in the northeast district to over 6 days in the northwest, west-central, southwest, south-central and southeast districts. The topsoil moisture supply was reported as 4 percent very short, 21 percent short, 72 percent adequate and 3 percent surplus, down slightly from a week earlier. The northwest district remains the driest area, with 62 percent rated as short or very short. The corn crop is 94 percent harvested, early caught up to last year's pace and slightly ahead of the the 5-year average of 92 percent. Progress varies from 87 percent harvested in the northeast and east-central districts to virtually complete in the west-central district and the southern third of the State. Ninety-seven percent of the soybeans are mature, about 5 days behind the maturity of both last year and average. Progress of maturity ranges from 90 percent or less in the southwest and south-central districts to 95 percent or more in all other districts. Seventy-seven percent of the soybeans are harvested, 5 days behind the 5-year average of 84 percent. Progress of the bean harvest ranges from 49 percent complete in the southwest district to 84 percent or more in the northwest and northeast districts. Ninety-nine percent of the sorghum is mature, with only the central and northeast districts showing as much as 4 percent not yet mature. Eighty-four percent of the crop is harvested, 10 days behind last year and a week behind the average of 90 percent. Progress is least advanced in the northeast, central and east-central districts where 65 percent or less is harvested, while all other districts range from 90 to 100 percent. Seventy-nine percent of the winter wheat acreage for next year's crop has been planted, 2 days ahead of last year but similar to normal. Planting progress ranges from 60 percent complete in the central district to 94 percent in the southeast. Fifty-nine percent of the wheat has emerged, 2 days ahead of average. Condition of the emerged wheat is rated as 22 percent fair, 71 percent good and 7 percent excellent, a minor improvement from a week earlier. Pasture condition is reported as 6 percent very poor, 15 percent poor, 38 percent fair, 35 percent good and 6 percent excellent, similar to a week earlier. Pastures in the northeast district are showing some improvement but are still indicated at 53 percent poor or very poor, while ratings in the rest of the State are closer to normal for this time of year.

lbs 90.00-100.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

With the possibility that cold weather is here to stay, hay movement is beginning to see more action now. Most sellers report they are keeping the trucks pretty busy at the current time. Many of the neighboring state are experiencing the same troubles we are having here in MO trying to find high quality hay and are also jacking prices when it is found. It is still hard to miss all the piles of average to low quality hay stacked through out the state; even so some optimistic sellers believe that there is a possibility that prices on this hay may rise with the approaching winter as well. Hay supply is moderate to heavy, demand moderate, and prices are steady with a firm undertone. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .10 higher, medium .04-.06 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .91-.95, Medium .73-.77, Small .43-.47.

SLAUGHTER LAMBS: Ch & Pr 90-150 lbs; shorn 86.00-88.00, woolled 84.00-86.00.

## MISSOURI WEEKLY HAY SUMMARY

Weather in Missouri continues to go from one extreme to the other. Hay sellers are giving about the same story. Some are barely stopping long enough to reload the trucks, while others are watching there truck tires dry rot from setting. It continues to be difficult to find higher quality hay and when one does most asking prices don't fall in the range that truckers can resell it and pay their fuel bill. Truckers are also covering more ground now looking for better quality hay. Lower quality hay continues to be very heavy in supply and moving at a slower pace. Prices on this hay remains steady, as you don't have to travel far to find a pile this year. Hay supply is moderate to heavy, demand moderate, and prices are steady with a firm undertone. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .09 higher, medium .05 higher, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large 1.00-1.04, Medium .78-.82, Small .43-.47.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.

lbs 90.00-100.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Winter temperatures arrived and seem to be staying now. A few snow flurries even fell in parts of the state this week. Demand for hay has dropped a bit this week most sellers are hopping it is due to the holiday week. The amount of mid to low quality hay and options of feed besides hay have sellers worried if the market will ever get hot this year or not. Even with the high cattle prices it has been difficult to hold a steady market to all hay besides some very high dairy hay and even that is beginning to slip, even though it is getting very difficult to find any to buy or sell. Some producers are now thinking that only if a very bad winter arrives will things get better this year and as much as they need to move hay not really wishing for that. Hay supply is moderate to heavy, demand moderate, and prices are steady. (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large 1.00-1.04, Medium .78-.82, Small .43-.47.

### MISSOURI WEEKLY HAY SUMMARY

The hay market continues to be stuck in the same ole wagon ruts, Not moving up or down just following along the same pre set path. Some winter weather arrived in the state to go along with the seasonably cool temperatures. Fog and misty drizzle filled most of the state, while other parts did receive some small amounts of snow. Most sellers are still moving small amounts of hay, but with the supply available it will take a long time to make any dents in the hay piles at this rate. The supply of hay is moderate to heavy, demand is moderate, and prices remain steady. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

### MIDWEST EGG REVIEW

Prices on large .17 lower, medium .12 lower, small .01 lower. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .83-.87, Medium .66-.70, Small .42-.46.

#### “Show-Me Select” Bred Heifer Sales

**Friday December 12, 2003 – 1:00 p.m.**

**F& T Livestock Market-Palmyra, MO**

**Hwy 24, South, Palmyra, MO**

Selling approximately 350 bred heifers, mostly black and black cross heifers with several black-whiteface and a few Charolais, Gelbvieh, and Simmental heifers, sorted into uniform lots of breed, color, size, and calving dates.

**Saturday December 13, 2003 – 1:00 p.m.**

**Wright County Livestock Auction Inc.**

**60 & 95 Hwy. Exit, Mountain Grove, MO**

Selling approximately 300 head of Angus, Hereford, Gelbvieh, Red Angus, and Simmental and crosses, About 80% are black, black-whiteface. Many are synchronized and AI bred.

All heifers have met minimum standards for reproductive soundness, pelvic size, body condition, frame, muscle, and weight and are free of blemishes. Heifers have been bred to bulls meeting strict calving ease/birth weight EPD requirements. A strict immunization program has been followed. Many have been synchronized, AI, and will calve in a short time period.

lbs 90.00-100.00 (per cwt.)

### MISSOURI WEEKLY HAY SUMMARY

Just about everyone was forced to climb out of bed and feed hay this week. About 3/4 of the state received snow Tuesday and Wednesday areas in the western part of the state got hit hardest with northwest receiving ice prior to the snow and areas in southwest getting large amounts of snow. Carthage reported to have had as much as 14 inches. Hay movement was put on hold for a bit by the snow. Generally movement is steady a few sellers dealing with wrapped hay have reported movement as being very good this year, more storms are forecasted for next week and if snow continues it should add some encouragement to the hay market, even with the still heavy supply of mid to lower quality hay. Prices remain mostly steady for all types of hay. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed or for a directory call 1-800-877-HAY(4429)(All prices per ton unless specified and most reflect delivered price) Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

### MIDWEST EGG REVIEW

Prices on large .12 lower, medium .14 lower, small .05 lower. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .71-.75, Medium .52-.56, Small .37-.41.

The Weekly Market Summary is available to anyone for an \$18.00 annual subscription fee. To subscribe, send your check or money order to: Weekly Market Summary, Missouri Department of Agriculture, PO Box 630, Jefferson City, Missouri, 65102

#### Comment Period Notice

The Missouri Department of Agriculture filed a proposed amendment with the Secretary of State's Office to increase the subscription fee for the *Weekly Market Summary* from \$18/year to \$25/year effective July 1, 2004. The amendment was published in the Missouri Register on December 1.

The subscription fee has not changed since 1995; however, postage and printing costs have increased significantly while the number of subscribers continues to decline.

Anyone may file a statement in support of or in opposition to this proposed amendment with the Department of Agriculture, Division of Market Information and Outreach, Loyd Wilson, Division Director, P.O. Box 630, Jefferson City, MO 65102. To be considered, comments must be received before December 30, 2003.

#### Mandatory price reporting survey link.

The National Cattlemen's Beef Association is asking producers to take an online survey concerning the Mandatory Price Reporting Law. Because of a sunset provision, the law is due to expire in October 2004 unless reauthorized. Survey results will be compiled for discussion at the NCBA annual convention in January. The link to the survey is

## MIDWEST SHEEP REVIEW

### Slaughter Receipts:

This week 61,000  
Week ago 62,000  
Year ago 62,000

Slaughter Lambs 2.00 lower  
Slaughter Ewes 5.00 higher  
Feeder Lambs steady

### SLAUGHTER EWES:

Utility and Good 1-3,35.00-45.00  
Cull 1, 25.00-30.00 (per cwt.)

### SLAUGHTER LAMBS: Ch & Pr

90-150 lbs; shorn 82.00-84.00,  
wooled 80.00-82.00.

### FEEDER LAMBS:

60-80 lbs 100.00-110.00, 80-100  
lbs 90.00-100.00 (per cwt.)

Many areas in Missouri are starting to reach pretty impressive or depressing snowfall totals for this year. The snow that fell last week however left about as fast as it came with temperatures reaching the low fifties on Tuesday. Once you add all the rain and snow and then warm temperatures together farmers are coming up with a nice supply of winter mud for feeding. At the current time hay sellers are staying fairly busy, hay movement is holding at about the same level as it has been all fall. Hay prices are reported as remaining mostly steady for another week. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed or for a directory call 1-800-877-HAY(4429)(All prices per ton unless specified and most reflect delivered price) Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large .02 lower, medium .02 lower, small unchanged. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .69-.73, Medium .50-.54, Small .37-.41.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

#### Definitions:

\*\* DIB = diameter inside bark at small end

\*\*\* MBF = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a Professional forester. For more information call 1-800-328-1165.

Utility and Good 1-3, 30.00-40.00  
Cull 1, 20.00-30.00 (per cwt.)

### FEEDER LAMBS:

SLAUGHTER LAMBS: Ch & Pr 60-80 lbs 100.00-110.00, 80-100  
90-150 lbs; shorn 82.00-84.00, lbs 90.00-100.00 (per cwt.)  
wooled 80.00-82.00.

## Weekly Hay Summary

Not much activity in the hay market this week as producers are celebrating  
the Christmas Holiday and not moving much hay. The weather has  
moderated over much of the state this week. Activity should improve after  
the holidays are over and buyers check on their needs for the New Year.  
Hay prices are reported as remaining mostly steady for another week. The  
Missouri Department of Agriculture has a hay hotline available for both  
buyers and sellers. To be listed or for a directory call 1-800-877-  
HAY(4429)(All prices per ton unless specified and most reflect delivered  
price) Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa  
80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-  
100.00. Good quality timothy hay 3.00-3.50 per small square. Good large  
round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00.  
Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw  
1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium steady, small steady. IOWA-  
MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per  
dozen) Large .69-.73, Medium .50-.54, Small .37-.41.

\*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

#### Definitions:

\*\* DIB = diameter inside bark at small end

\*\*\* MBF = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.
